npm warn deprecated @npmcli/move-file@1.1.2: This functionality has been moved to @npmcli/fs  
npm warn deprecated npmlog@6.0.2: This package is no longer supported.  
npm warn deprecated inflight@1.0.6: This module is not supported, and leaks memory. Do not use it. Check out lru-cache if you want a good and tested way to coalesce async requests by a key value, which is much more comprehensive and powerful.  
npm warn deprecated glob@7.2.3: Glob versions prior to v9 are no longer supported  
npm warn deprecated rimraf@3.0.2: Rimraf versions prior to v4 are no longer supported  
npm warn deprecated are-we-there-yet@3.0.1: This package is no longer supported.  
npm warn deprecated q@1.5.1: You or someone you depend on is using Q, the JavaScript Promise library that gave JavaScript developers strong feelings about promises. They can almost certainly migrate to the native JavaScript promise now. Thank you literally everyone for joining me in this bet against the odds. Be excellent to each other.  
npm warn deprecated (For a CapTP with native promises, see @endo/eventual-send and @endo/captp)  
npm warn deprecated gauge@4.0.4: This package is no longer supported.
